NO. 71.

TER GOLD BELT.

An Apriforous Zone, Fifty Kiles Wide. Honning Through Georgia.

corr. Beading Eagle !

Before the discovery of gold in California the gold belt of the Atlan-

Dahlonega, Lumpkin county, G., in morrow. less than twenty years coined over \$50,000,000 in gold. A large quantity extracted from the soil did not find its way to the mint, and the estimate which places the Georgia product at \$40,600,000 in twenty years is by no means extravagant. If this was accomplished by the crude methods known in those days, what 35 PER CENT!! may we not expect from the im-proved means of our own time?

At the present time there are over five hundred stamps at work within a few miles of Dahlonega, and one of these mills, having a battery of five stamps only, yields from twenty to twenty-five ounces per week, an average of \$600 per week, or \$120 per stamp. The mill is run by a small engine, which pumps its water from the mine, affording water for washing also. The mill frame stands immediately over the shaft, which is now about ninety feet deep, and the ore is said to grow richer as the shalt descends. In this mine the quartz yields from \$1 to \$6 per ton, and the cost of mining, cru-hing and amalgamating is only twenty-five or thirty cents per ton. Labor is procurable at from eighty cents to \$1 per day, and the cost of living is as low as in any part of the United States.

The quartz leads in this section are very numerous. I speck from experience, having visited within a twelvementh the gold region of north. east Georgia. During my stay there I saw an old mine, out of which several hundred thousand dollars had formerly been taken, reopened, and out of a "pocket" in the vein \$300 was taken in a single panful of ore. A ton of this pocket ore would yield 30,000. Of course these incidents POPCLAR CLOTHING STORE are rare, and really do not advance the gold interest, for extravagant hopes are aroused, and these not being fulfilled, the reaction is injurious to all concerned. But there are veins of quartz, from four to five feet thick, in which more or less gold will be found in every ton of ore. The extremes range from fifty ANNUAL PICNIC EXCURSION cents to as many dellars per ton. Bit there is a reliable average, which will afford a basis of calculation, which is really more certain than almost any business in these 'hard

capitalists in the North, ATOR East and West have suffered loss by the non-employment of their means. Here, in the heart of the South, and cessible by railroad from all direc tions, is a gold region in the compass of thirty miles square which can yield \$500,000,000 of gold without driving a shaft 500 feet deep, and yet it is suffered to lie comparatively idle.

FELL DEAD

Audden Death of James Trevillian in Brandt's Saloon-Some Particulars of his Life-The Cause of his Beath Past Mortem Examination of the Coronor's Inquest.

[Eureka Republican 19th.] James Trevillian, a man well by special conductors and guards on the trains, and by a large force of special police. State, but a recent arrival in Eureka, fell dead in Louis Brandt's new saloon last night. Dr. Cram was at once sent for and pronounced that life was extinct. Dr. Bishop, the Coroner was also called, and the body was removed to the Morgue. This morning Dr. Bishop summoned the following

Coroner's Jury: John Henry King, E. J. Butler, J. M. Greer, J. Byrne, W. J. Miller and W. J. Thomas. The iury was sworn at the Morgue and the body received, after which forther proceedings in the inquest were adjourned until 3 P. M. to-day, when the evidence will be heard. Dr. Bishop in the meanwhile has held a post mortem examination upon the hody of deceased, and we learn from him that there is no doubt that death resulted from congestion of the lungs, and from atrophy of the heart. There is as we write a probability that the jury will arrive at a verdict this evening in accordance with the facts.

The deceased was a native of Cam-

borne in the County of Cornwail, England, and was born in 1843, being therefore thirty four years of age at the time of his death. He came to America in 1868 in response to a call from his father Wm. Trevillian who was then engaged as a samer of the Post see PRINTING CALL in the Forest and Date mine in the R this offer. who was then engaged as a tainer

His mother at the old home died on receiving the news of her husband's death, and young Trevillian moved to Colorado.
